

## **- Charter of Ecology and Sustainability -**

At Beautifood, we are committed to promoting the most sustainable and environmentally friendly practices in all aspects of our catering service. This charter outlines our commitments to ecological and sustainable management of our activities.

### **1. Responsible Sourcing**

We prioritize sustainably produced products, preferably local and seasonal, to minimize our carbon footprint and ensure the freshness and quality of the products.

We prefer short supply chains for fruits, vegetables, and beverages. For European products, we favor labeled items and prioritize traditional expertise. We choose suppliers who share our values of ethics and sustainability.

### **2. Raising Client Awareness**

We inform our clients about our sustainability commitments and the actions we take to reduce our environmental impact.

We encourage our clients to adopt sustainable practices, such as incorporating more fully vegetarian and vegan menus to reduce the carbon footprint.

### **3. Waste Management**

We implement strategies to minimize food waste, such as precise quantity planning and donating surplus food to local associations.

### **4. Use of Sustainable Materials**

We invest in durable and energy-efficient equipment. We do not use single-use packaging under any circumstances and consistently invest in high-quality, durable equipment designed for long life. This includes kitchen utensils, appliances, and furniture.

### **5. Use of Ecological Cleaning Products**

We preserve our planet by using Eco-label cleaning products, significantly reducing the impact on the environment and the health of our employees.

### **6. Energy and Water Savings**

We adopt energy-saving practices in our kitchens and offices. We install water-saving devices, such as low-flow faucets and water-efficient dishwashers, to reduce our consumption. We regularly monitor our water usage to act quickly in case of leaks, thus preventing waste.

### **7. Awareness and Training**

We offer regular training programs to our staff to inform them about Beautifood's sustainable and ecological practices and encourage them to adopt these practices in their daily lives and work.

### **8. Innovation and Continuous Improvement**

We constantly seek innovations to improve our ecological impact. We regularly evaluate our practices and implement improvement actions.

### **9. Commitment**

At Beautifood, we are committed to respecting and implementing this charter daily, to contribute to a greener and more sustainable future for all.
